Company Information

At a glance, PT DEXA Medica is one of the leading Indonesian pharmaceutical companies that was established 53 years. PT DEXA Medica is one of the largest Indonesian pharmaceutical companies in the prescription medicine market (source: IQVIA). We have five (5) active manufacturing sites which meet and comply with the international GMP authorities such as PIC/s, UK-MHRA, and Indonesia Food & Drug Agency (BPOM RI).

At the moment, our products have been exported and others in four (4) continents (Europe, North America, Africa & Asia) in multi-countries, such as the UK, the Netherlands, Poland, the USA, Canada, South Africa, Nigeria, Hong Kong, Sri Lanka, and several ASEAN countries as well.

Despite generic medicines, We would like to promote & focus on our research herbal products that are originally from Indonesian Biodiversities, such as STIMUNO (for Immune Booster), HERBAKOF (Cough), HerbaAsimor (Breastfeeding), HerbaPoten (Men vitality), and Redacid (GI protectors).

Our herbal products' uniqueness is:

- Discovered from Indonesian biodiversity
- Researched by using International Advanced & Innovative Methods
- Passed the pre-clinical and clinical trials
- Certified as phytopharmaceutical and standardized herbal products

Certification

UK MHRA for solid dosage form since 2008

Company Information

Kalbe International Pte. Ltd, as a part of Kalbe Farma group, was established to mainly handle export business for all Kalbe group's products. Focusing on strengthening Kalbe Farma Group's businesses in more than 30 countries including Cambodia, Malaysia, Myanmar, Philippines, Thailand, Vietnam, Singapore, Sri Lanka, South Africa, Nigeria, and more across the globe, to improve health for a better life through innovation. While Forsta Kalmedic Global, as a subsidiary of PT. Enseval Medika Prima (Kalbe Group) is engaged specifically in manufacturing medical and diagnostic devices. FORSTA operates a manufacturing facility located at the KBIC Building, Jl. Pulogadung 23, Pulogadung Industrial Area, East Jakarta, Indonesia. FORSTA launched the ELVALENE product, which is a Non-absorbable Surgical Suture as its first commercial product which is designed and manufactured with high-quality materials and meets local and international standards (Indonesian Pharmacopeia, European Pharmacopeia, and United States Pharmacopeia) at a competitive price. Elvalene offers a high level of local content and has been certified HALAL and ISO 13485: 2016. To complete the suture product portfolio, Forsta is currently carrying out product development for Synthetic Absorbable Suture and Natural Suture Products which will be officially launched in the first quarter of 2023.

Certification

Medical Device Production Certification; Local Good Manufacturing Practice Certification; ISO 13485 : 2016 Quality Management System Certification; Halal Assurance System Certification.

Pictures and Product Information

Elvalene is a monofilament, nonabsorbable, synthetic surgical suture made of polypropylene. Elvalene is available in USP size 1 – 5/0 and dyed in blue color to increase visibility during the procedure.

Characteristic

- Smooth passage of suture through tissue
- Excellent knot tie-down and security
- Minimal acute inflammatory reaction in the tissue
- Indefinite tensile strength retention
- High-quality needle
- Use of Elvatrack packaging to lower suture memory and ensure needle quality

Indication

General soft tissue approximation, including use in ophthalmic surgery, cardiovascular tissue, and neurosurgery.

COMING SOON

Elvadio surgical suture is a synthetic, absorbable, monofilament, and sterile surgical suture composed of the polymer Poly(p-dioxanone). **Elvadio** surgical sutures are dyed with D&C Violet No 2

COMING SOON

Elvacryl surgical suture is a synthetic, absorbable, multifilament, and sterile surgical suture composed of a copolymer made from 90% glycolide and 10% L-lactide. **Elvacryl** surgical sutures are dyed with D&C Violet no. 2

COMING SOON

Elvamoto surgical suture is a synthetic, absorbable, monofilament, and sterile surgical suture composed of a copolymer made of glycolides and epsilon-caprolactone. **Elvamoto** surgical sutures are dyed with D&C Violet no. 2.

COMING SOON

Elvarapid surgical suture is a synthetic, absorbable, multifilament, and sterile surgical suture composed of a copolymer made of 90% glycolide and 10% L-Lactide. **Elvarapid** surgical sutures are available undyed which is beige in color.

COMING SOON

Elvaplain surgical suture is a natural, absorbable, monofilament, and sterile surgical suture composed of collagen from bovine or ovine catgut. It is available undyed which is beige in color.

COMING SOON

Elvachromic surgical suture is a natural, absorbable, monofilament, and sterile surgical suture composed of collagen from bovine or ovine catgut. **Elvachromic** is treated with chromic salt solutions and is brown in color.
